

Forward Fuel Reserve Disposition — Exercise KESTREL (Fictional)

1 Purpose

This fictional document records the disposition of forward fuel reserves for demonstration Exercise KESTREL. It is marked confidential purely to test access control; nothing in it is real.

2.1 Reserve Holdings

The forward reserve at demonstration site BRAVO holds 84,000 litres of diesel and 6,200 litres of aviation fuel. The reserve at site DELTA holds 41,500 litres of diesel only.

2.3 Replenishment Trigger

Replenishment is initiated when the diesel holding at any forward site falls below 30 per cent of its authorised level. For site BRAVO this trigger point is 25,200 litres.

3.1 Convoy Routing

Resupply convoys for Exercise KESTREL route via the fictional CHARLIE corridor with a scheduled turnaround of 26 hours. The alternate route adds 9 hours and is used only when the primary corridor is closed.

4.2 Authorising Officer

Release of the forward reserve requires the authority of the exercise logistics officer, appointment code LOG-KES-02. No release may be made on verbal instruction alone.
