

# Operational Readiness Assessment — Eastern Sector

Reference OPORD-CONF-114 Revision A Unit: HQ Demonstration Command

**CONFIDENTIAL — handling restricted**

*FICTIONAL CONTENT — generated for platform testing only.*

## 1 Purpose

To record the recovery-capability readiness of the Eastern Sector against the establishment requirement, for command decision. All figures in this assessment are fictional.

## 2.1 Readiness Against Requirement

Overall recovery readiness in the Eastern Sector stands at 68 percent against a required baseline of 85 percent. This is the lowest figure recorded across the four sectors in this reporting period.

## 3.4 Equipment Shortfall

The assessed shortfall is 11 recovery vehicles across 12 Field Workshop and its two forward detachments. Of these, 7 are attributable to vehicles held awaiting spares beyond 90 days.

## 4.2 Limiting Factor

The principal limiting factor is recovery crew availability rather than vehicle holdings. Only 23 qualified recovery mechanics are held against an establishment of 34.

## 5.1 Recommendation

Recommend a temporary cross-attachment of 4 recovery vehicles from the Central Sector reserve for a period of 90 days, reviewed monthly.

## 6 Handling

This assessment is CONFIDENTIAL. It is releasable to full-access holders only and shall not be quoted in unclassified correspondence.
