

How the system works

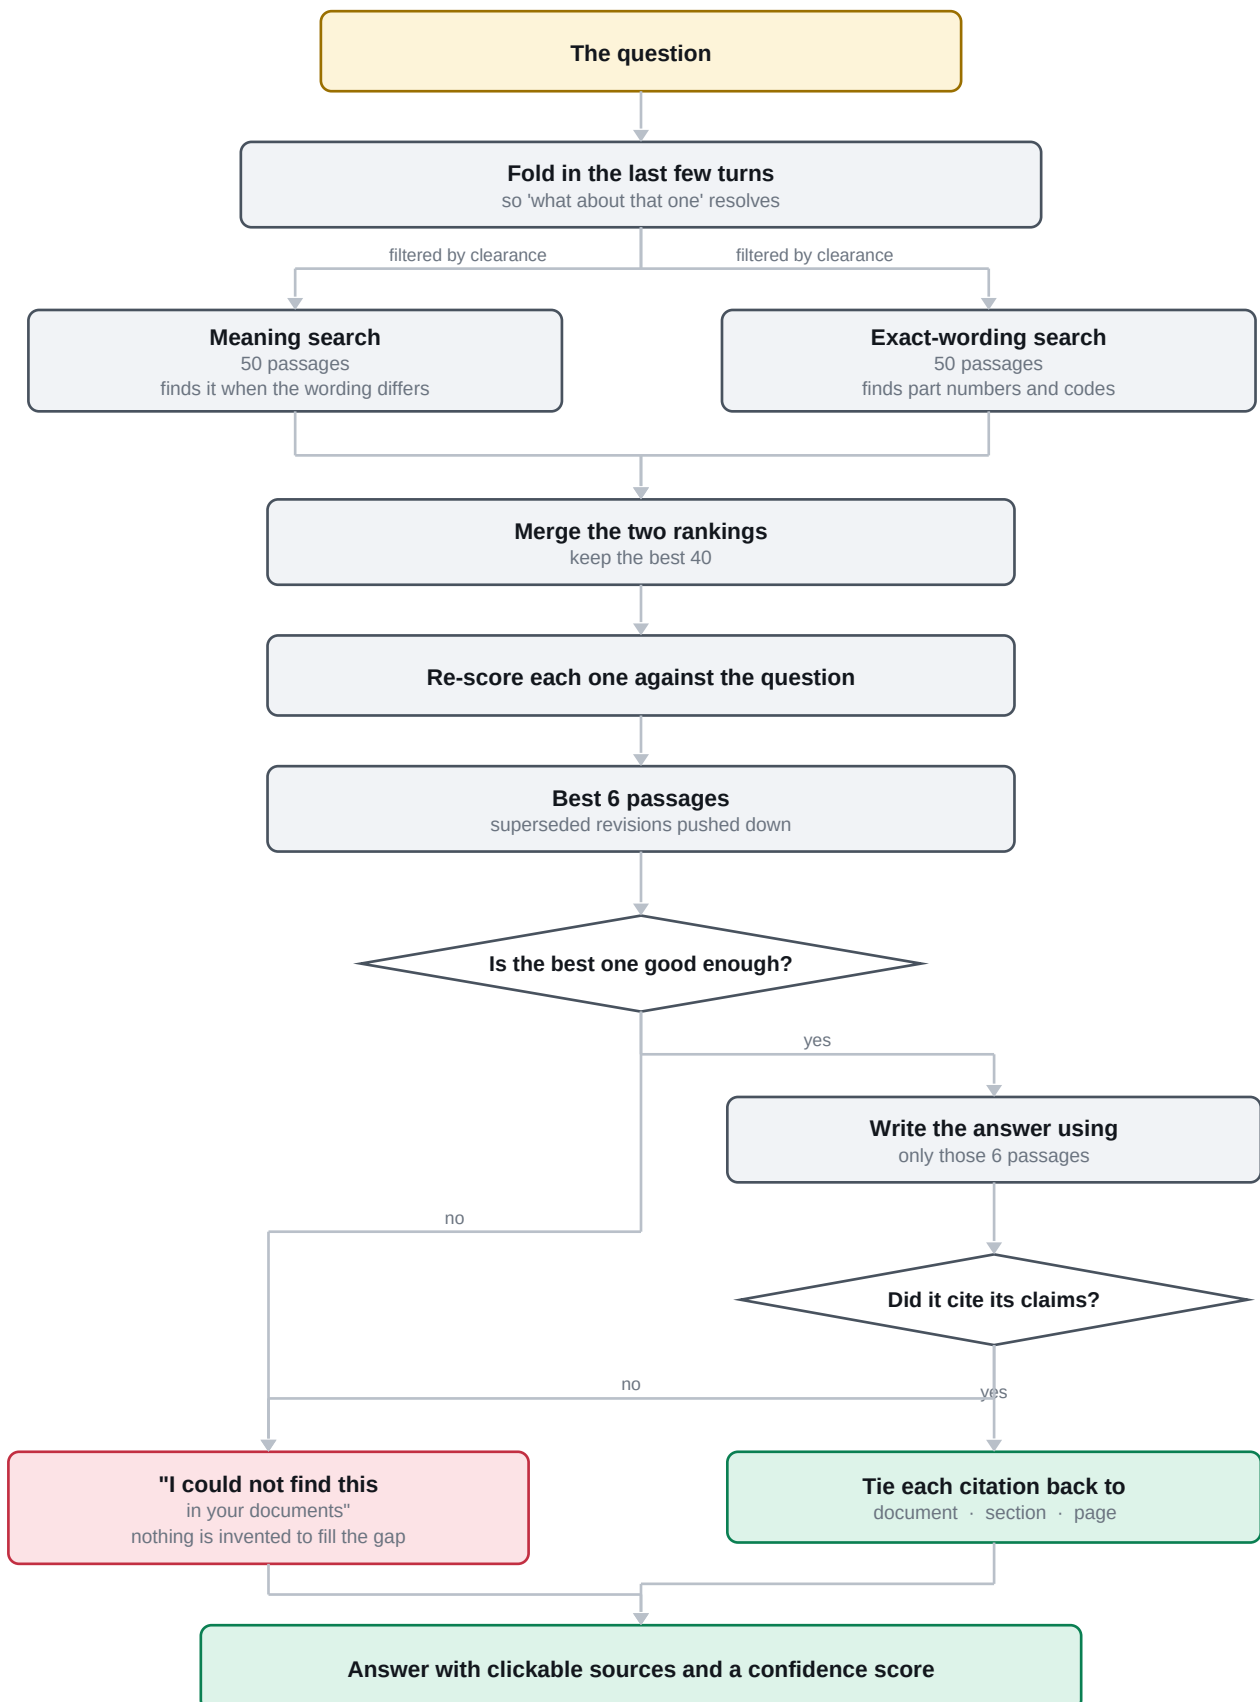

DKIP · 1 of 3

Sign-in to a cited answer — both roles

clearance 1-4 is applied inside every search, not as a screen filter — a document above your level is never retrieved

Two searches, one gate, no guessing

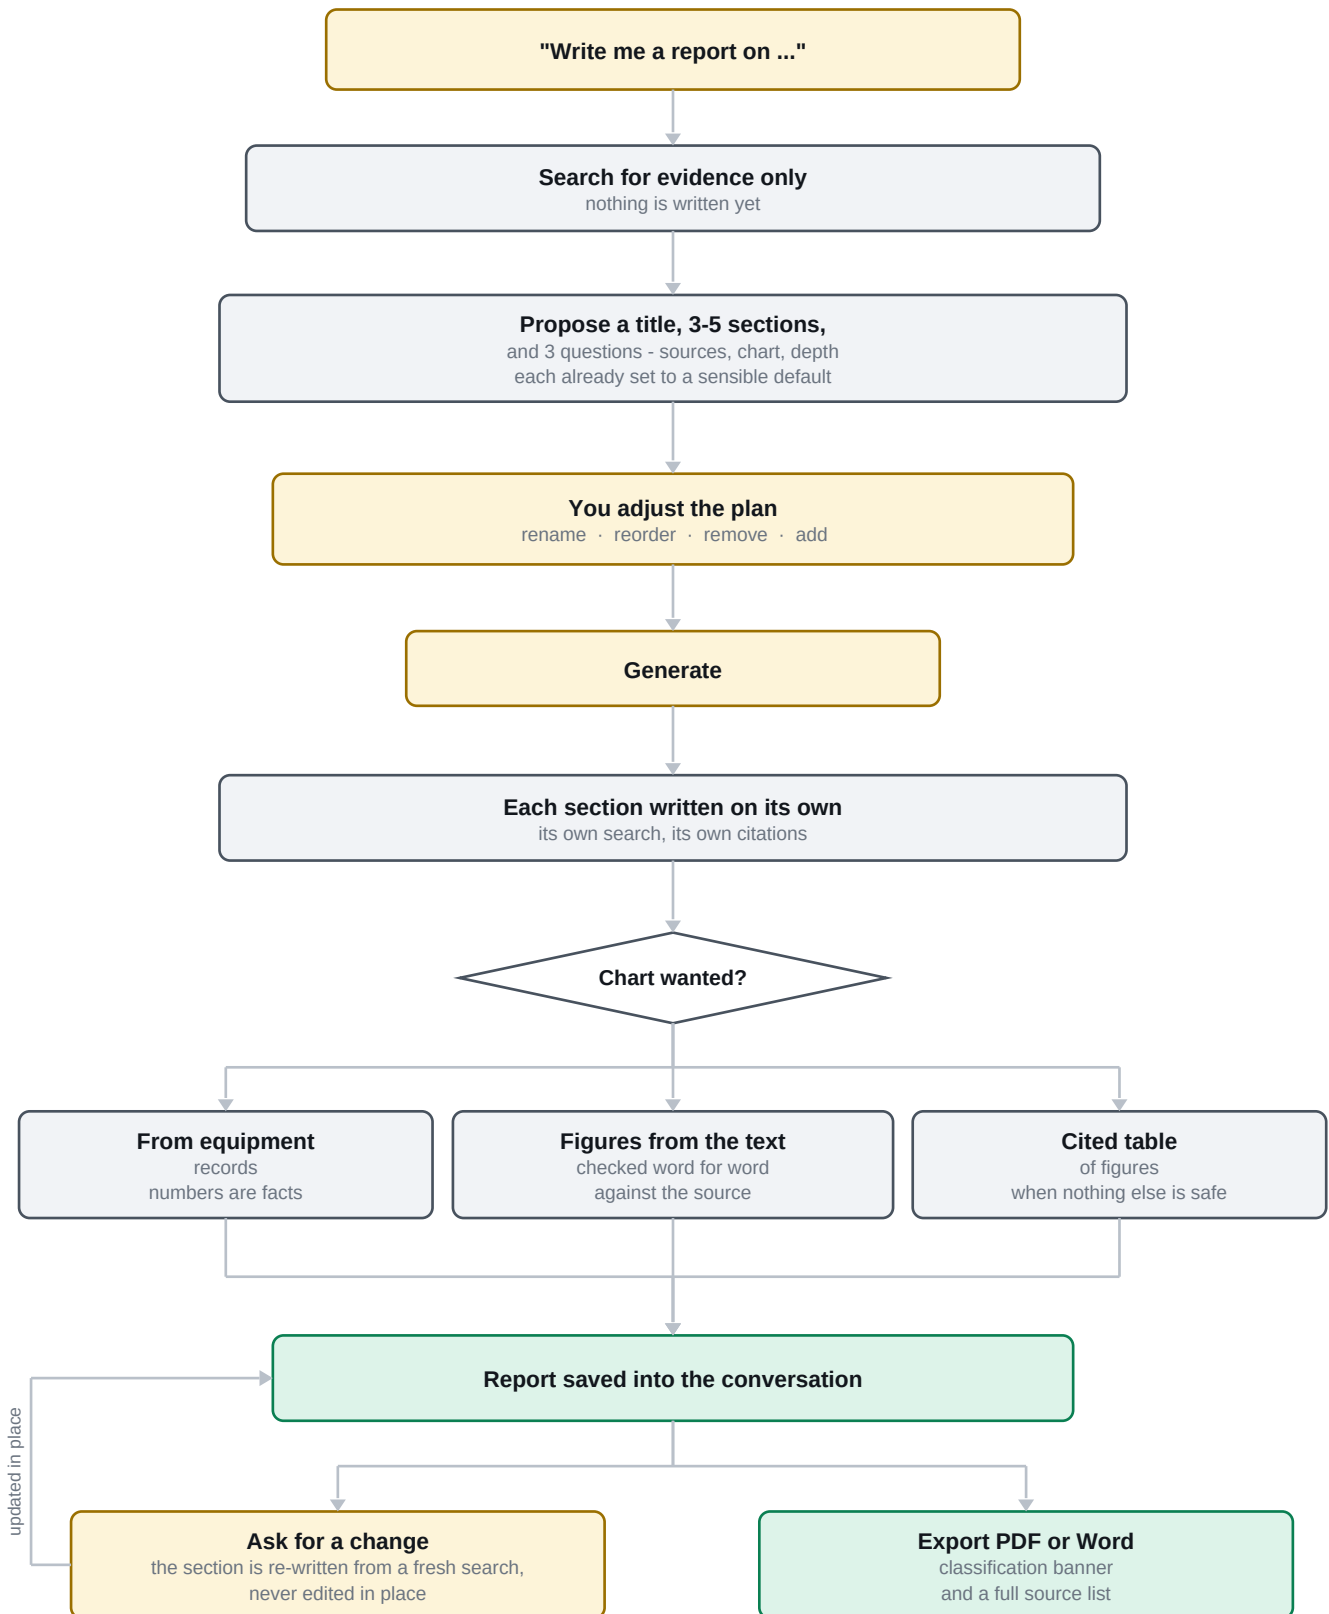

50 + 50 candidates -> 40 merged -> 6 used · below a 0.15 score it declines to answer

How a report is built

DKIP · 3 of 3

Planned first, written second, revised by talking

citations are re-bound on every rewrite, so they never drift off the sentences they support
